

GOLDEN VEIL

BRIDAL

CARING FOR YOUR VEIL

Keep it soft, smooth & beautiful

Your veil may arrive softly folded for shipping. A few gentle steps are usually all it needs to fall beautifully again before your wedding day.

1. UNPACK	2. HANG	3. STEAM GENTLY
Remove it from the shipping poly bag as soon as practical.	Let it hang freely for 24-48 hours to release light creases.	Use low, indirect steam only if needed. Keep heat away from the fabric.

How to remove creases

- **Start with gravity.** Hang the veil by its comb from a veil hanger or sturdy padded hanger and let the tulle fall freely for 24-48 hours. Do not peg or clip the tulle itself.
- **Try bathroom steam.** Hang the veil safely in the bathroom while a hot shower runs. Keep it well away from water and the shower itself.
- **For stubborn creases, use a garment steamer on LOW.** Keep it about 20-30cm away, keep it moving and work slowly from top to bottom.
- **Never iron tulle directly.** High heat can melt, shrink, shine or distort delicate bridal fabrics.

Before the wedding

- Store in a clean, dry place away from direct sunlight, moisture, pets, makeup, perfume and hairspray.
- Keep the veil loose rather than tightly folded. If needed, place clean acid-free tissue between folds.
- The clear poly bag is for shipping protection; remove it for longer-term storage so the fabric can breathe.

If your veil has a sewn-in care label, follow that first. For major stains or very delicate embellishment, use a bridal garment specialist.

BRIDAL

CARE BY VEIL STYLE

A little extra care for every finish

Use the closest match below for your Golden Veil style.

Plain soft tulle

Hayley, Skye, Isla and other plain veils

Care: Hang freely and use gentle low steam from 20-30cm away. Avoid rough jewellery, Velcro and sharp edges.

Lace / embroidered

Madeline, Siena, Daisy and lace-edged styles

Care: Support the lace rather than pulling it. Steam lightly from the reverse side and keep extra distance from dense embroidery.

Pearl / beaded

Cove, Luna and embellished styles

Care: Handle by the comb or plain tulle. Avoid direct steam on pearls, beads or adhesive points. Store heavy styles flat or loosely folded with tissue.

Double layer / blusher

Sarah, Eva and layered veils

Care: Separate the layers gently before hanging or steaming. Smooth each layer individually so it falls naturally without twisting.

Chiffon

Capri, Lucy and chiffon styles

Care: Use gentle steam on the lowest effective setting, keep the steamer moving and never press a hot iron directly onto the fabric.

MARKS, WEDDING DAY & AFTER

Marks: blot gently - do not rub or use bleach. For important stains, use a bridal cleaner. **Wedding day:** lift the veil over rough paths and keep away from candles/open flames. **After:** make sure it is fully dry, then store loosely with acid-free tissue in a breathable box or garment bag.
